## **Join the community conversation...**

As Frederick residents take a close look at our quality of life both now and for future generations, there is a growing consensus that a sustainable community should be our vision and is within our reach. We at OURCOMMONWEALTH are working together to understand our challenges and find ways to address them. The OCW **IMAGINE! Frederick** film series is a community educational program and will offer residents the venue to learn and discuss actions to move our community towards economic, environmental and social sustainability.
